

ANDY'S ECHO

(pronounced: "an-dees eh-kow")

electronic live act & producer from Hamburg

THRILL ME live video:

LIVE TRAILER:

Andy's Echo produces and performs electronic music with live guitar, vocals and synths.

Before starting out as electronic live act in 2019, he played in several Indie Bands as guitarist, singer and songwriter, while at the same time becoming interested in electronic music and rave culture.

He has dedicated himself to exploring the musical area in-between his band-based work, house and techno. His live setup consists of him mixing his original productions while **performing guitar, synthesizers and vocals live on stage**, and experimenting with sound processors and oscillating tape delays. This amounts to danceable tracks, ranging from technoid to melancholic with a psychedelic feel.

Within the first year of his live activity, Andy's Echo already played shows at **Übel & Gefährlich, Mensch Meier, Dockville Festival** and **Reeperbahn Festival** and will be playing on the upcoming **AfrikaBurn** - the regional **Burning Man** event in South Africa. He also played at the **Virtual Burning Man**.

In May 2020, Andy's Echo released his debut EP 'Thrill Me' on **3000Grad/Acker Records** followed by releases on Slow Punch and **Dirty Doering's** label **Mukke**.

Tech Rider:

The tour party consists of one person. I strongly prefer to play live sets. DJ sets are also possible.

For a LIVE SET I will bring the following:

- Fender Telecaster electric guitar
- Steinberg UR22 USB Audio Interface
- MacBook Pro 15"
- Two midi controllers
- Audix OM7 vocal microphone

What I need from the event site for a LIVE SET:

- Two power outlets with two separate multiway connectors (at least three free power sockets)
- A DJ booth consisting of a rectangular table (basically, I just need a table to put my stuff on – about 110x55cm of free space – see figure below)
- monitor speakers in the DJ booth that are adjustable in volume by the artist
- A full size microphone stand plus clamp (suitable for an Audix OM7 or similar)
- A guitar stand
- If necessary, a riser, in order that the crowd's view on the guitar performance won't be blocked
- I will mix the sound myself and send the stereo sum from my audio interface into one free stereo channel of your mixer. Don't put any processing (like compression) on the signal chain – if necessary, please inform me.
- **A sound check, if possible, is highly recommended!**
- I need around 30 minutes for the changeover and **please make sure there is enough free space for my equipment in the DJ booth. Please take care that no drinks will be placed near the equipment!**

What I need from the event site for a DJ SET (live sets are strongly preferred though):

- Two Pioneer CDJ 2000NXS2 (linked!)
- A Pioneer DJM 900 Nexus NXS2
- A pair of stereo monitor speakers in the DJ booth, adjustable in volume

Beverages & stuff:

- Beer, water, sparkling wine, mate soft drink
- A fresh towel

Thanks already for your efforts! If anything is unclear, feel free to contact me.

Gigs:

06.09.21 – Potsdam, Rechenzentrum (live)
26.08.21 – Zurück zu den Wurzeln Festival (live)
